

# ZK6 Jurisdiction Correlation Report

Generated 2026-06-07 08:00 ET · window: 2026-05-08 to 2026-06-06 (30 days, completed draws)

Methodology: each historical jurisdiction draw was matched against the same-date ZK6 slate for that scope (midday/evening) and the allday slate. A box hit = the draw's sorted comboset appears in any of the 6 slate picks. Straight hit = exact bestOrder match.

| 2  | WV           | 26    | 4        | 15.4% | 0             | 0.0%       |

| 7  | AR           | 56    | 5        | 8.9%  | 2             | 3.6%       |
| 8  | TX           | 208   | 18       | 8.7%  | 0             | 0.0%       |
| 9  | WI           | 59    | 5        | 8.5%  | 0             | 0.0%       |
| 10 | VA           | 60    | 5        | 8.3%  | 1             | 1.7%       |

**Reading the table.** Box% is the share of that jurisdiction's draws (last 30d) whose comboset appeared on the same-date ZK6 slate. National average across all 39 tracked jurisdictions is roughly 6–8%. **MN, WV, DE** lead by box rate; **DC** leads absolute straight hits (6 in 30d), reflecting its 5 draws/day cadence.

## 1b. Per-Scope Hit Split (where the correlation lives)

| Jurisdiction | Midday box | Evening box | Allday box (any session) |
|--------------|------------|-------------|--------------------------|
| MN           | —          | 2 / 30      | 4 / 30                   |
| WV           | —          | 3 / 26      | 2 / 26                   |
| DE           | 2 / 30     | 1 / 30      | 5 / 60                   |
| DC           | 1 / 30     | 6 / 60      | 3 / 90                   |
| QC           | —          | 3 / 30      | 0 / 30                   |
| OK           | —          | 3 / 30      | 1 / 30                   |
| AR           | 1 / 26     | 3 / 30      | 1 / 56                   |
| TX           | 3 / 52     | 2 / 52      | 6 / 104                  |
| WI           | 1 / 30     | 2 / 29      | 2 / 59                   |
| VA           | 3 / 30     | 0 / 30      | 2 / 60                   |

**Pattern.** Evening-only jurisdictions (MN, WV, QC, OK) cluster the top of the board — consistent with the evening signal stack landing in May/June (CONFIG-11a CO boost, CONFIG-13 WARMING). DC and TX accumulate hits via volume rather than rate.

## 4. Takeaways

- The Top-10 leaderboard is dominated by single-session (evening-only) jurisdictions. That is consistent with the evening-scope retuning shipped in June (CONFIG-11a CO boost, CONFIG-13 WARMING signal).
- Today's strongest midday pick by historical Top-10 representation is **739** (11 hits / 90d). Strongest evening pick is **803** (8 hits, OK/WI/TX); strongest allday picks are **518** and **014** (both 8 hits, DC/DE-led).
- **DC** is the highest-volume correlator (150 draws, 16 box hits, 6 straight) and remains the best single jurisdiction to monitor for slate verification because its 5-draws-per-day cadence reduces noise faster than rate-leading peers.
- **Caveat.** Pick #4 in evening and allday slates (**476**) has the thinnest historical footprint in the Top-10 set (3 hits / 90d), all from TX + OK. Slate-engine indicator is high (0.878/0.893) but jurisdiction-confirmation is weak.
